MULTI-RESIDENTIAL PROJECTS OVER 6 DWELLING UNITS UP TO 2 RESIDENTIAL STOREYS

Allisee

Privacy and parking were the main problems to be resolved with this design. Being built into an existing community the client wanted to provide something affordable yet upmarket that would complement the surrounding environment. The parking issue was overcome by providing each townhouse with a double lock up garage and enough parking on each driveway for individual tenants. Additional parking was provided for the body corporate on the site over and above town plan requirements. Building footprints were reduced by having bedrooms upstairs and with the master bedroom to the rear for privacy.
